

Differentiation-

Lesson Planning Frame: (Example: Health)

Topic/Unit

Big Objective: (covered over a period of time)

Lesson Objective: (may have content, literacy, and technology objectives)

Teacher Background: (basic information covered in lesson and overall description)

Teacher Preparation: (materials, technology preparation, items to download...)

Co-Teaching Model:

Focused Instructional Strategies:

Motivation: (set the stage for the objective, provide rich experience, present questions, vocabulary introduced, summarize the rich experience...)

Procedures: (read text to support content, writing activity, meaningful task provided to support objectives, variety of centers for range of learners...)

Evaluation: (observation, varied products, assessment/quiz)

Differentiation (consider ALL learners)

Content: (text provided at instructional level)

Process

Differentiation-

Lesson Planning Frame: (Example: Science)

Topic/Unit

Big Objective: (covered over a period of time)

Lesson Objective: (may have content, literacy, and technology objectives)

Teacher Background: (basic information covered in lesson and overall description)

Teacher Preparation: (materials, technology preparation, items to download...)

Co-Teaching Model:

Focused Instructional Strategies:

Engagement: (rich experience, present questions, vocabulary introduced, summarize the rich experience...)

Exploration: (document what they already know, provide opportunity for quality discussion, provide cooperative learning opportunities, think-pair-share...)

Explanation: (analyze results from exploration, quality discussion related to questions, opportunity to adjust scientific ideas generated earlier...)

Extension: (read text to support content, writing activity, meaningful task provided to support objectives, variety of centers for range of learners...)

Evaluation: (observation, varied products, assessment/quiz)

Differentiation (consider ALL learners)

Content: (text provided at instructional level)
